WE OPEN
A NEW CHAPTER
IN *natural oiled*
WOOD FINISHING

More natural.
More sustainable.
More us.

Oil Plus 2C

Every piece of wood has a story. It grows, it breathes, it changes. At Mobitec, we believe that honouring wood means celebrating its nature – not covering it.

That's why we've chosen a new oil for our furniture: Oil Plus 2C. A next-generation finish that protects and enhances the beauty of wood, while keeping its natural touch and warmth alive.

It's our way of bringing together craftsmanship, sustainable innovation and ease of care – to create furniture that inspires genuine moments of well-being.

WHY OIL PLUS 2C?

Starting from January 2026 all our oiled wooden tables and chairs will be finished with Oil Plus 2C from Rubio Monocoat because it enhances what defines our furniture – its natural beauty, its purity, and its lasting strength.

This innovative solution prevents overlaps and marks, ensures minimal product consumption, and provides long-lasting protection – all while preserving the wood's authentic look and natural fibre structure. Perfectly suited for both residential and professional spaces.

Sustainability as a core value

At Mobitec, sustainability is more than a principle – it's part of our vision.

By choosing Rubio Monocoat Oil Plus 2C, we reaffirm our commitment to crafting furniture that respects both nature and the people who live with it. **Made from natural ingredients and free from harmful emissions**, this oil embodies our core values: authenticity, durability, and genuine care for the environment.

THE *advantages* OF OUR NEW OILS AT A GLANCE:

— ONE SINGLE LAYER – LESS IS MORE

Oil Plus 2C only needs a single layer to do its work. **The oil bonds with the wood fibres**, rather than forming a film on top – preserving the natural look, feel, and depth of the grain. Quick drying.

The result: a soft, matte finish.

— SAFE & ECOCONSCIOUS – 0 % VOC

Made from natural ingredients and certified 0% VOC, Oil Plus 2C is completely **safe for both people and the planet**. It supports a healthy indoor climate and meets the highest international standards for air quality and sustainability – including GREENGUARD Gold, Eurofins Indoor Air Comfort Gold, and the A+ Label for low emissions.

Certified food-safe, it's perfectly suited for dining tables and living spaces where everyday life unfolds naturally.

But sustainability at Rubio Monocoat goes far beyond the formula itself.

The oils are based on linseed, a renewable resource that grows quickly and abundantly, and every stage of production reflects the same environmental care – from responsible sourcing and energy efficiency to waste reduction and recyclable packaging.

— RESISTANT & EASY TO MAINTAIN

The oil creates a surface that resists scratches, wear, water, and heat. Minor marks or stains can be repaired locally, while larger areas can easily be refreshed with light sanding and re-oiling – no professional help needed.

Rubio Monocoat offers simple, effective care products that renew protection and keep the wood's natural beauty alive.

8 COLORS THAT KEEP WOOD *real*

Within the Mobitec collection, the oil will be available in a palette of 8 different colors for oak, beech and walnut – from light, natural tones to deep, warm shades.

Each hue highlights the unique character of the wood, allowing its grain and texture to shine through beautifully.

OAK

WALNUT

BEECH

*These colours replace
the previous oil finishes
E01, P01 and N01.*
